PROJECTS

E-com

- Built using **React,Nodejs firebase Mongooes** and adding some concept like **jwt Auth Tostify BootStrap mui** etc .
- Also Add Some features **login/signup auth Cart** and adding some concept like **Model control view and some middle ware Axios Fetch** etc
- Online Catalog: An online catalog is a key feature of an e-commerce website.**It allows businesses to display their products or services with images, descriptions, and pricing**
- Personalization: E-commerce websites can use personalization features to offer customized experiences for individual customers. **This can include personalized product recommendations, tailored messaging, and customized promotions.**

Facebook Clone

- Built using **React,Node js** concept like **Flex-box** and , some api **Component, jwt Middleware** etc .
- User Profiles: User profiles are an essential feature of a Facebook clone. **They would need to display profile pictures, cover photos, user information, and a timeline of their posts and activity.**
- Also useing some Csx Frame work Likes , **Mui bootstrap react tostify** etc

Pet App Website

- Built a Pet App using **javascript,Mui,bootstrap**
- Product Listings: The app would need to have a product listing feature that displays pet food products, including images, descriptions, and prices.
- Push Notifications: Push notifications can help keep customers informed about new products, promotions, and other updates related to the app.

Netflix Clone

- The goal of creating this project was always to create new series and update the show. Try for Netflix clone. And had to show 70% the name of the show and the pic of the video without buying it .
- api and using advance concept of **css ,javascript and html** search bar (Some features yet to be added to the project.....)

SKILLS

Data Structure

JavaScript

C++

Python

HTML

CSS

Bootstrap

Reactjs

Node

Express

MongoDB

Mongoose

SQL

Redux-tool-kits

Firebase

Git

Git Hub

REST API

EXPERIENCE

Internship In A gravity As a Front end Dev

- Understanding of React Fundamentals: An intern should have a clear understanding of the concepts of React and some FrameWork, such as **components, state, props, and JSX Jwt, Multer , Google-Auth,Payment-Gateway**
- Experience with React Toolkits: Familiarity with React **Toolkits, such as Material UI, Ant Design, or React Bootstrap,**can be valuable in building responsive and user-friendly web applications.

COURSE WORKS

- Data Structures and Algorithms
- Object Oriented Programming
- Database Management Systems
- Operating Systems
- Networking

CODING PROFILES

- GFG: Mom Gupta
- Leetcode:Mom Gupta
- AccioJob:Mom Gupta(24.5k)

AREAS OF INTERESTS

Problem Solving

Web Development

Explore New Technology

Data Structure

HOBBY

- Building Personal Projects: Working on personal projects can help a developer explore new technologies and apply their skills to real-world problems.
